

## **Lakeside Inn**

Located by the lake roughly half way between Village Centre and Sports Plaza, the main entrance to Lakeside Inn is accessed from the pathway which circles Village Centre to Sports Plaza.

There is ramped access from Village Centre pathway to the main doors and around to the decking area overlooking the lake. There are 6 small steps from Sports Plaza pathway.

The main entrance has manually operated double doors that lead into a vestibule with access to toilets. These are not accessible. A second set of manually operated double doors lead into the main bar area.

An accessible toilet is provided via a short corridor next to the bar.

Orders for food and drink are placed at the bar, which has a lowered section, and food is brought to tables from the kitchen.

The majority of Lakeside Inn is on a single level. However, there is a raised area adjacent to the bar and a lowered area overlooking the lake. Both these areas are accessed via steps.

There is level access to the children's play areas but internally there are two levels within the play area, access to the upper level being via a steep set of steps.

The external boardwalk of Lakeside Inn is accessible via a double door from within the Inn or from the side access of the building near the steps from Sports Plaza path. The boardwalk is on two levels with a single step between levels.

Large print and Braille menus are available on request.
