

Enchanted Light Garden

The Enchanted Light Garden starts on a bark area near to a food outlet behind Santa's Woodland Workshop.

This then leads on to a compressed bark path around the light trail. It is about 100 meters long. This finishes on a tarmacked path.

Flashing and bright lights are a fundamental element of this experience. However, Center Parcs has received advice that photosensitive epilepsy is most likely to be triggered by (among other things) lighting flashing/strobing at a rate of 2hz (2 times per second over an extended period of time). The lights on the trail have been programmed avoiding this rate and do not continually flash for extended periods of time.
