

Mobile Telephone Coverage

The following mobile telephone networks have varying degrees of reception across the village. The reception for the following networks is generally as stated, but due to trees, topography, etc. this may also vary:

02	Good
Vodafone	Good
T-Mobile	Average
Orange/EE	Poor

Other networks have limited coverage across the village.

Within the Village Centre buildings and immediate surroundings, all networks may suffer from areas of poor coverage.

All main buildings and Lodges have WI-FI available which can be used to make WI-FI Calls, dependent on smart phone capability and service provider. Third Party Apps may be required.
